Funchal, Madeira, Portugal

TERMÍN: 15. 3. 2025 – 22. 3. 2025

PROJEKT: **Our Planet, Our Responsibility: Learning from the Earth's Ecosystems for a Sustainable Future**

## Animals in Madeira

### 1. Madeiran wall lizard (*Teira dugesii*)

- You can find it almost everywhere on Madeira – mostly in places like rocks, cliffs and stone walls.
- It is very fast and escapes from enemies easily – it can even drop its tail when it feels in danger.

### 2. Madeiran bat (*Pipistrellus maderensis*)

- It is the only native land mammal on Madeira.
- It is a night animal – it hunts insects and it also eats blueberries.

### 3. Zino's petrel (*Pterodroma madeira*)

- It is a very rare bird – it only nests in a few places in the mountains of Madeira.
- It flies long distances over the ocean and comes back every year to the same nesting place.
- During the day, it hides in the rocks. It is active at night.

### 4. Madeiran large white butterfly (*Pieris wollastoni*)

- This butterfly lives only on Madeira – nowhere else in the world.
- It is very rare and hard to see because it lives high in the mountains.

### 5. Madeiran Land Snail (*Actinella* spp.)

- These snails live in the forests and mountains of Madeira.
- There are many kinds of them, and most of them live only on this island.
