

SKUPINOVÁ MOBILITA: CEIP EDUARDO LÓPEZ PALOP, ENGUERA, VALENCIE
ŠPANĚLSKO

TERMÍN: 21. 3. – 28. 3. 2026

PROJEKT: Active EU Citizen: Unidos en la diversidad / Jednotni v rozmanitosti

REPORT: GROUP MOBILITY OF PUPILS ENGUERA, SPAIN **WEDNESDAY 25TH MARCH 2026 MORNING**

Hubert Tieku 6.B

On Wednesday we all met in front of the school and we set off for the bus which was already waiting for us. There **we went to Valencia** we drove for about an hour and a half and then we arrived at Valencia.

Right after we got off the bus so we went to have a snack.

They made us a snack in front of the school. After we had a snack **we went to the science museum** the museum was huge and was **shaped like a fish** the museum had 3 floors.

Later we picked up our tickets and went into the museum and the first part of the first floor **was about Leonardo Da Vinci**. We looked at **a lot of his inventions** like a diving suit or a propeller ski or some other mechanical devices.

We went through a machine that finds the height from a photo and a lot of pictures.

tures.

Then we headed towards the other sections in one we saw the direct **evolution of a chicken**. Then we went to look **at the physics and mathematics department** where they **explained different subjects and they played different videos**.

Right after that we went to the second floor which was **focused on books** they had a lot of books and documentaries. There I went to watch documentaries about the second

world war and the history of Valencia. The consequences of the second world war in Valencia or for example the first landing on the moon.

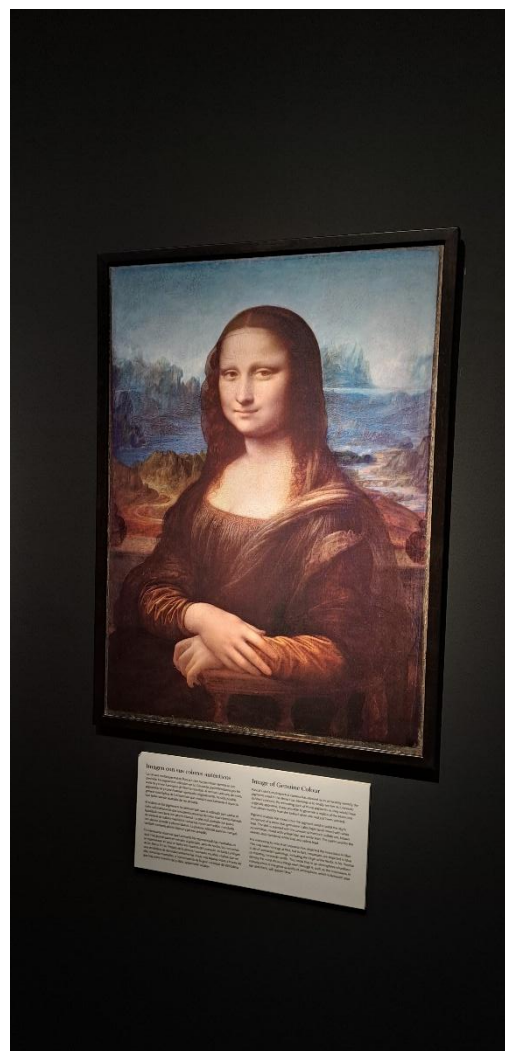

After we finished reading that we went to the third floor the beginning of the third floor was about space where we learned a lot of interesting **things about our solar system and also about physics.**

Then we went **to the mirror room** which was very cool and next to that was a room which **allowed you to see in multiple perspectives.** Then there was a **section full of physical experiments** like jumping power drag speed and many others. We spent there all morning. Finally, we left the museum and had a snack.

Reproducing famous Da Vinci's paintings

Mona Lisa

Hatching chickens
