

SKUPINOVÁ MOBILITA: IES FRANCISCO SALZILLO Alcantarilla, Murcia, Španělsko
TERMÍN: 1. 2. 2026 – 8. 2. 2026
PROJEKT: Active EU Citizen: I love myself

REPORT: GROUP MOBILITY OF PUPILS ALCANTARILLA, SPAIN
FRIDAY 6TH FEBRUARY 2026 MORNING
Magdalena Kamanová 9.A

On Friday we had a very interesting day during our Erasmus+ stay. The theme of the day was **learning about the European Union and wellbeing**. We took part in several activities that helped us learn new things, work together, and also enjoy nature.

The day started at **8:30** with an **Erasmus TikTok**

workshop. During this workshop we learned how students can use social media. It was fun to be with students and teachers from different countries and think about creative ideas.

After that, we went on a short trip to **Paraje del Agua Salá Natural Park**. We learned about the local environment and why it is important to protect nature. The teachers explained the plants and animals that live there and talked about sustainability. It was nice to spend some time outside in nature.

Later we visited an **orchard**, where we could see different fruit trees and learn about local agriculture. The teacher explained how fruit is grown in the region and why orchards are important for the local economy. It was interesting to see how people work with nature and produce food.

At **11:10** we had a short **break**, when we could relax, go to the school canteen, talk with friends, and share our experiences from the morning activities.

After all the activities, we had a **farewell lunch in the school canteen**. This lunch was

special because we tasted traditional Spanish food Paella, and it was the first time we all ate together at school. Students, parents, and teachers talked, laughed, and gave us certificates.

At **3:00 p.m.** we went home with our **host students**, where we had lunch and spent more time

together. It was a great opportunity to experience everyday life in a Spanish family and talk about our cultures.

Overall, Friday was a wonderful and meaningful day. It was a beautiful end to the whole week. We learned about nature, technology, culture, and teamwork. Erasmus+ gave us the chance to meet new people, improve our English, and create memories that we will never forget.
